

Vas County Centre for Vocational Education and Training

Hefele Menyhért Vocational School, Szombathely

Decorator training

Our school, the Hefele Menyhért Secondary Technical and Vocational School is the biggest vocational school for building and wood industry in county Vas. It has several decades of experience in vocational education.

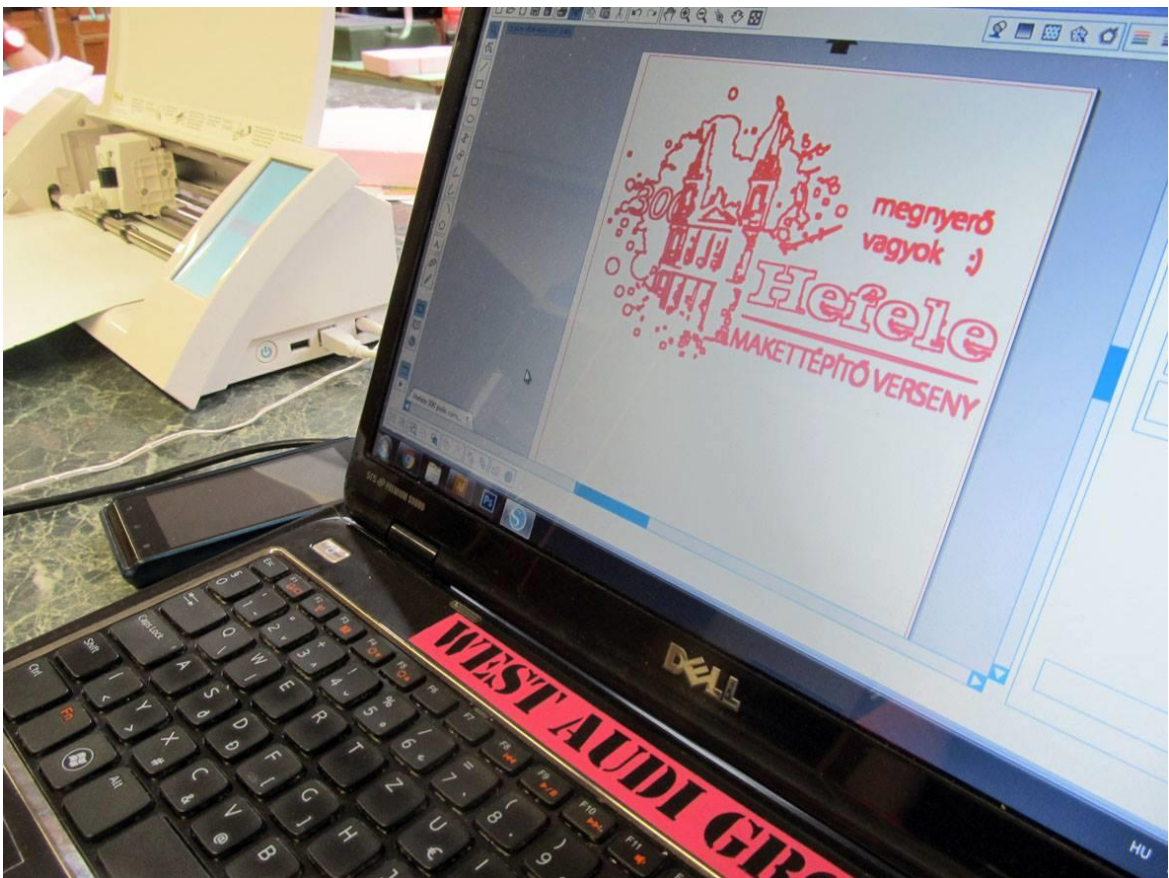

The interior decorator training started in 2001 in our school. Nowadays - due to the changes in vocational training - we can train decorators on the level 5, according to the European Qualification Framework. Our students deal with freehand drawing, computer graphic tasks, word processing, designing commercial spaces, window-dressing and planning tasks. Our students should be creative and they should have good manual skills, handicraft and artistry - as related skills.

The outcome requirements: the written examination consists of art history and professional theoretical tasks. The practical part of the final exam: our students have to prepare their own masterpiece, which means to create the documentation of designing a commercial space. Moreover, they present their portfolio which contains their tasks and drawings completed during their studies.

During the school years, our students regularly take part in study tours. Every year we visit the Budapest Design Week and the International Milan Furniture Fair and Design Week. At the beginning of the school year we organize a creative art camp in the Kőszeg Mountains. Our students usually apply for different projects, the most outstanding competition is the International Architecture Student Conference organized by Porta Speciosa. The neighbouring settlements often ask our students to help in connection with decorating their environment.
